

Comprehension Quiz (not graded)

Assume the patch is 1:1. Also assume that DMX uses the values 0 – 100, and transmits them in decimal form. Given the following channel data on the “Output” or “Live” screen of a console:

Ch1	Ch2	Ch3	Ch4	Ch5	Ch6	Ch7	Ch8
100%	70%	10%	25%	50%	66%	45%	90%

What would the DMX output stream be?

Given the following softpatch:

Dim:	1	2	3	4	5	6	7	8
Ch:	7	4	6	4	3	1	4	2

What would the DMX output stream (from the above channel data) be?
